Abstracted and/or Indexed in: Engineering Information, Inc.

Editorial Office: S. A. Nasar, Department of Electrical Engineering, University of Kentucky, Lexington, KY 40506.

Publishing, Advertising, and Production Offices: Publishing and Advertising: Hemisphere Publishing Corporation, 79 Madison Avenue, Suite 1106, New York, NY 10016-7892, (212) 725-1999; or Taylor & Francis Ltd., Rankine Road, Basingstoke, Hampshire RG24 0PR, England. Production: Hemisphere Publishing Corporation, 1101 Vermont Avenue, N.W., Suite 200, Washington, DC 20005-3521, Telephone (202) 289-2174, Miriam Gonzalez, Production Editor.

Electric Machines and Power Systems (ISSN 0731-356X) is published bimonthly by Taylor & Francis Ltd., 4 John Street, London WC1N 2ET U.K. for Hemisphere Publishing Corporation. Annual 1991 institutional subscription UK £176, US $299. Personal subscription rate available to home address only and must be paid by personal check or credit card, US $125.

Second-class postage paid at Jamaica, NY 11431. U.S. Postmaster: Send address changes to Electric Machines and Power Systems, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland, where the sterling price applies. All subscriptions are payable in advance and all rates include postage. Subscriptions are entered on an annual basis, i.e., January to December. Payment may be made by sterling check, dollar check, international money order, National Giro, or credit card (AMEX, VISA, Mastercard/Access).

Orders originating in the following territories should be sent directly to: **Australia**—R. Hill & Son, Ltd., Suite 2, 119 Gardenvale Road, Gardenvale, Victoria, Australia 3185. **India**—Universal Subscription Agency Pvt. Ltd., 101-102 Community Centre, Malviya Nagar Extn., Post Bag No. 8, Saket, New Delhi. **Japan**—Kinokuniya Company, Ltd., Journal Department, P.O. Box 55, Chitose, Tokyo 156, Japan. **New Zealand**—R. Hill & Son, Ltd., Private Bag, Newmarket, Auckland 1. **USA, Canada, and Mexico**—Taylor & Francis, Inc./Hemisphere Publishing Corp., 1900 Frost Road, Suite 101, Bristol, PA 19007, USA. **UK and all other territories**—Taylor & Francis, Ltd., Rankine Road, Basingstoke, Hampshire RG24 0PR, England.

SUBJECT INDEX TO VOLUME 19

Analysis of heating and losses in generator field discharge resistors and generator rotors following severe disturbances on the electrical supply system, 459
Analysis of synchronous motor stability using Hopf bifurcation, 239
Analytical solution of the transients in induction motors due to asymmetrical terminal fault, 1

Brushless constant-frequency generation using single-frame cascaded induction machines, 399

Comparison of two analytical methods of determining the starting transients of a single phase induction machine, 705
Computer-aided design of a permanent magnet motor, 501

Damping of electromechanical oscillations using a static VAR system with feedforward and feeedback controllers, 185
Digital simulation of a vector current controlled axially-laminated anisotropic (ALA) rotor synchronous motor servodrive, 415
d-q analysis of a variable speed doubly ac excited reluctance motor, 125

Effect of rotor dynamics on steady state subsynchronous oscillations in series compensated power systems, 201
Emerging electric machines with axially laminated anisotropic rotors: a review, 673
End-winding influence on homopolar effects in asymmetrical three-phase machine windings, 527
Estimating of steady state voltage and frequency of power systems from digitized bus voltage samples, 555
Excitation of variable-reluctance motor drives, 713

General overview of multiple objective optimal power flow in hydrothermal electric power systems, 313

Improvements in rectangular form of FDLF for networks with special features, 577
Influence of induced currents in conductors on leakage and losses in a transformer, 55

Loss items evaluation in induction motors fed by six-step VSI, 513
LQI-type load-frequency control with first-order sampling holder under consideration of generation rate constraints, 15

Methodology of secure and optimal operation of a power system for dynamic contingencies, 639
Mid-term dynamic response of isolated power systems to generation outages, 27
Modeling the incremental cost and water conversion functions for hydro-thermal coordination studies, 271
Modified Froelich's type equation for accurate modeling of magnetising characteristic of magnetic cores, 303

New PWM algorithm for battery-source three-phase inverters, 43

Observations on the design of distributed armature winding by poly phase symmetrisation, 363
Optimal centralized controller with nonlinear voltage control, 139
Optimal shunt compensation for unbalanced linear loads with nonsinusoidal supply voltages, 171
Optimal state feedback control of a current source inverter-fed induction motor drive using a new rotor current observer, 347
Overview of power generation scheduling in the optimal operation of a large scale power system, 731

Performance evaluation of static VAR compensated system with auxiliary controls, 251
Performance analysis of self-excited induction and reluctance generators, 477
Performance analysis of the repulsion motor controlled via rotor triac, 625
Performance evaluation of static VAR compensated system with auxilliary controls, 251
Performance study of a chopper controlled induction motor, 81
Power controller for a wind-turbine-drive tandem induction generator, 599
Prediction of the instantaneous and steady state torque of the switched reluctance motor using FEM with experimental results comparison, 287

Sliding mode speed controller for trapezoidal brushless motors, 157
Some aspects on design and development of human operated generator for desalination plant, 439
Static state estimation of multiterminal dc/ac power system in rectangular coordinates, 69
Successive linear programming method for improving economy and security in ac-dc systems, 223
Switched-reluctance motor performance analysis based on an improved modeling of its magnetic characteristics, 425
Synchronous reluctance machines—a viable alternative for ac drives?, 695

Time-domain modeling of frequency-dependent three-phase transmission line resistance, 115
Torque vector control (TVC) of axially-laminated anisotropic (ALA) rotor reluctance synchronous motors, 381

Unified approach to optimal power flow solutions using GRG, 103
